ABOUT ME

Juan Antonio brings a grounded approach to his work in software engineering, with a notable emphasis on backend development. He has a keen interest in getting to grips with the essential principles of software architectures, algorithms, and data structures, always eager to enhance his understanding in these domains. These positions have not only reinforced his technical abilities but have also provided him opportunities to work collaboratively with diverse teams, helping him to develop effective communication skills and a cooperative work ethic.

SOFT SKILLS

- Continuous learning
- Communication
- Teamwork
- Dedication
- Adaptability
- Time management
- Problem solving

Education

- 2016-2022 B.Sc. Computer Science
University of Murcia
- 2022-2024 (Current) M.Sc. New Technologies in Computer Sciences
University of Murcia

Experience

- 2021-2021 Full-stack developer Intern
Metaenlace
- 2021-2022 Full-stack developer Software Engineer
Metaenlace
- 2022-2023 CyberDataLab member Investigator
University of Murcia
- 2022-2023 Valkyries H2020 Investigator
University of Murcia
- 2024 Backend developer Software Engineer
Orbyn

Languages

- Spanish - Native
- English - B1
- German - A1

Projects

- Intern developer at Metaenlace
- Distributed application for medical appointments (Angular, .Net 5, SpringBoot, Oracle SQL)
- Full-stack developer at Metaenlace
- Full-stack applications for Servicio Murciano de Salud (Java Server faces + Primefaces, Spring Framework, Oracle SQL)
- CyberDataLab member at University of Murcia
- Desktop application for the study of Brain-Computer Interfaces (Electron.js, React.js, FastAPI, MySQL)
- Web application for malware detection and classification in IoT devices (React.js, FastAPI, MySQL)
- Backend developer at Orbyn
- Development of microservices for an innovative core banking platform (Micronaut, PostgreSQL)

Stack tech

- Programming languages
- Kotlin, JavaScript, HTML, CSS, Node.js, Java, Python, PostgreSQL, MySQL, Oracle SQL
- Frameworks
- React.js, Angular, Electron.js, FastAPI, Spring Boot, Micronaut
- Tools
- Git, Kafka, Docker, SVN, Jenkins
