ABOUT ME

I am a software engineer focused on backend development, with a strong interest in building efficient, scalable solutions. I prioritize adaptability and continuously refine my skills to stay current with industry trends.

My experience collaborating with diverse teams has enhanced my communication and teamwork skills. I approach challenges methodically, using analytical thinking to understand problems and deliver effective solutions.

My goal is to contribute to projects by applying a thoughtful, detail-oriented approach to software development, ensuring high-quality outcomes that align with organizational objectives.

STACK TECH

- Kotlin (Micronaut)
- Java (Spring Boot)
- Python (FastAPI)
- Node.js
- RDBMS (PostgreSQL, MySQL, OracleSQL)

Education

- 2016 – 2022 B.Sc. Computer Science – University of Murcia
- 2022 – 2024 M.Sc. New Technologies in Computer Sciences – University of Murcia

Languages

- Spanish Native
- English B2

Experience

- 2021 – 2021 Intern Full Stack Developer – Metaenlace
Complete and individual design and development of a web application, covering both backend and frontend, for scheduling medical appointments.
Spring Boot 2, .NET 5, Angular 11, Bootstrap, OracleSQL, Git, SVN.
- 2021 – 2022 Full Stack Developer – Metaenlace
Development of full stack applications for the Servicio Murciano de Salud.
JavaServer Faces (JSF), PrimeFaces, Spring Framework, Oracle Database, Git, SVN, Jenkins.
- 2022 – 2023 Full Stack Developer (R&D&I Scholarship) – Cybersecurity and Data Science Lab at the University of Murcia
Complete and individual design and development of a desktop application integrated with a backend for research on non-invasive brain-machine interfaces.
JavaScript, Node.js, Electron.js, React, Python, FastAPI, MySQL, SQLAlchemy, Git.
- Complete and individual design and development of a web application, including backend and frontend, for malware detection and classification in IoT devices.
JavaScript, Node.js, React, Python, FastAPI, MySQL, SQLAlchemy, Git.
- 2022 – 2023 Valkyries H2020 – University of Murcia
As a partner of the University of Murcia, I contributed to the European Valkyries project, which consisted of the harmonization and pre-standardization of equipment, training and tactical coordinated procedures for first aid vehicles deployment on european multi-victim disasters.
- 2024 – Current Backend Engineer – Orbyn
Development of the backend based on microservices of a fintech application.
Kotlin, Micronaut, Gradle, Hibernate, JPA, Kafka, JUnit, Mockito, PostgreSQL, GitLab, Docker, AWS, Scrum, JIRA.

Publications
